

My experience in Italy

In the morning, we got to the airport and checked in successfully. The flight went well, and in the afternoon, we got to our hotel, where we put our luggage down, after that, we looked around the city, where we got ice cream, and could go into shops.

On Monday, we went to school, where we were surprised by the school's principal, and the mayor of Novara, who both gave us a speech about the school and the country! For most of the day, we were in classes, such as geography, PE and yoga. On Tuesday we did the same routine in the morning but a little bit earlier, in school, we drew in the same style as Picasso and then went to physics. After that, we explored the kindergarten and played volleyball during PE. We explored the city, where we went shopping, and then went back to our hotel. On Wednesday, we had maths, biology, and chemistry, where we got DNA from a banana. We explored the basilica of Turin, inside there were two of the same buildings, because the outer building was built on top of the older one. Thursday was all about exploring, because we went to Turin, where there were lots of stores and big areas. Then we had some free time, we went to the mall. Before we went back to the hotel, we went to the school, because they held us a farewell party, there were lots of Italian food and drinks. On Friday we visited Milan after school. The city was massive with lots of people and football shops. We visited the Milan cathedral, even went to the top of it, where the view was beautiful. We went back to the hotel and started packing for Saturday.

On Saturday, we got up at around 7:30 and ate breakfast, then went to the bus stop to wait for the bus. The trip to the airport was about an hour, we checked in, got on the plane and successfully landed in Hungary.
