

# MY TRIP TO ITALY

04/05/25 - 10/05/25

The Erasmus mobility in Novara was an unforgettable experience for me. I was very excited even before the trip to discover a new country and meet new people.

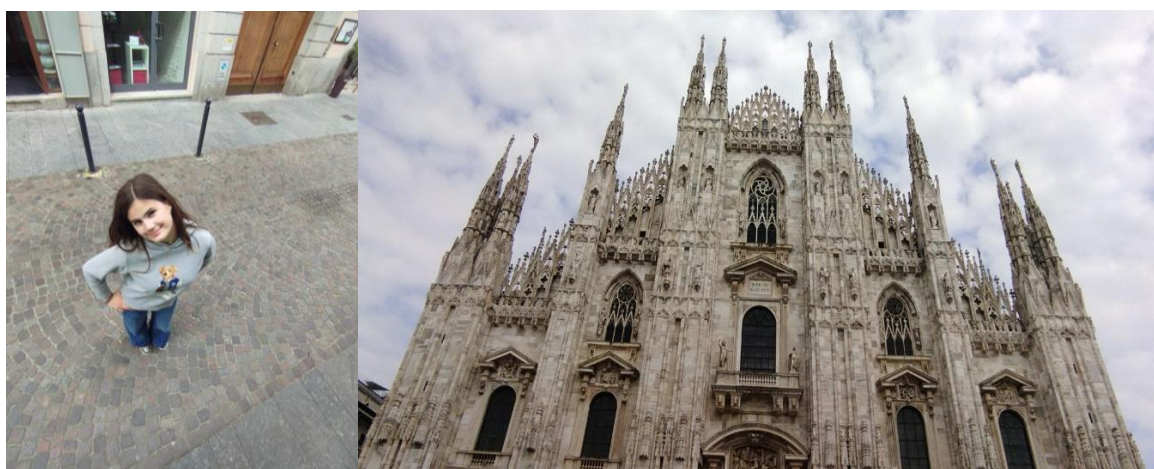

The Italian school was very different from ours, but it was exciting to take part in geography, math, P.E., music, and robotics lessons. The teachers and students were very kind and helpful.

I especially enjoyed the group projects where we built a skyscraper model, a model of the Novara Cathedral, and created drawings in the style of Picasso. During these activities, we learned a lot about teamwork and each other's cultures.

While exploring the city, we discovered the beauties of Novara and saw many new things.

In our free time, we played games, did sports, and had lots of conversations in English with students from other countries. This helped me become more confident and improve my language skills.

I gained a lot of new experiences during the program. I became more open-minded, independent, and made many new friends. This experience will stay with me forever.
