

My trip to Pula

We went to Pula on the 6th of April, and we stayed there for a week. The trip started in Dunakeszi, where we got on the bus.

The Croatian people were nice and welcoming, and we learned about local traditions, we ate delicious local specialities.

The kids in Pula were friendly and helpful. We got to know each other pretty well throughout the week. The Croatian education system seemed quite similar to ours, yet the openness of the teachers and students was particularly impressive. We

participated in several school-based activities, like pottery workshops, P.E. competitions, project work together with Croatian children in the lessons, quizzes, and a dance event. We ate lunch in the school canteen every day and we chatted with the students a lot outside the lessons as well.

In addition to school activities, we explored many places together. We visited Rovinj, went on a boat trip, explored Kamenjak National Park, where we experienced asparagus picking and we even went dolphin-watching. We also had a guided tour of Pula, where we saw many important historical sites. These excursions helped us better understand the region's culture, nature and history.

We also went swimming in the sea. Since we were there in the spring, the sea water was very cold.

Me and the other students from my school got along very well. We became very good friends, and we have been ever since. Every night we played board games and ate snacks.

The whole trip was great fun, and we learned a lot. On the last day, our teachers prepared a surprise for us, and we had a funny quiz which we enjoyed very much.

During my Erasmus+ mobility in Pula, I had the opportunity to improve my English communication skills and gain valuable international experience. Throughout the programme, I became more comfortable speaking English with both my classmates and foreign students. This trip also strengthened my independence and confidence.

I'm happy that I could participate in this Erasmus+ mobility.
