

My time in Pula

In April 2025 we visited Pula, a city in Croatia. It's quite close to the sea.

The day before day one my dad and I were packing up all the things that I might need. I packed up a suitcase and a backpack.

Day one. We had to go to the school's bus stop because that was the place where the bus was waiting for us. The bus driver's name was Dániel. We were traveling for about ten hours. After arriving at the hotel we ate dinner and went to sleep.

Day two. This was our first day in the school. The school is very big, and it was full of people. We visited some lessons, and we checked out the garden too. The most important thing on day two was that we went to Rovinj. In Rovinj I ate the best pizza in my life. We also visited a temple.

Day three. We were on a tour around Pula; the tour's title was Badass People in Pula. Me and the group took a stop at the colosseum. It was pretty fun. This day was quite long because after the colosseum we went on a boat trip.

Day four. This day was about school and a natural park. The park was very interesting, we saw a lot of animals, for example bugs and also dinosaur footprints.

Day five. On day five we participated in a lot of classes. We went to a pottery lesson; there we made lots of different objects from clay. I made a mug. The teacher said that we will get them back. I remember that we had an IT class about cyberbullying. There was a little boy who said that he had been bullied through Fortnite. At the end of the day the school organized a disco party for us. I don't really like discos and big parties with strangers, so I didn't really enjoy it, but it was better than I had expected.

Day six. It was the best day of all of them. My favourite place that we visited was probably the cliff where we saw dolphins and I even could make a video of them.

Day seven. The last day wasn't really exciting because it was the same as the first day. We had to pack our things, and we were preparing for coming home. I was a bit unhappy because the days had passed very quickly.

I loved the time that I could spend in Pula. It was one of the best school trips.
