

Erasmus + Pula, Croatia

With the Erasmus + program, students and teachers can get to know and practice new teaching or learning methods, as well as the English language with students studying abroad. This year, I had the opportunity to participate in such a mobility program in Croatia.

The journey there went smoothly. The accommodation was clean and well-kept, and I was very satisfied with it, as well as with the local food, because we had breakfast and dinner there.

We went to school every day where we received a wonderful welcome. The students almost immediately started asking us about Hungary and life there.

I made friends with a few girls that day and I still keep in touch with some of them.

The lessons were also very interesting, for example, the pottery class. We really enjoyed working together with the Croatian students. We could learn a lot from each other.

On our last days, they even organized a school party for us, which was quickly energized by Hungarian music.

Our programs were very diverse and exciting. We visited the attractions of Pula, the Aquarium, Rovinj, and Kamenjak National Park as well. One of my favourites was the dolphin watching. It was very exciting to wait for a dolphin to appear. I also really liked that sometimes we got a little free time which we could spend as we wanted to. I am very thankful that I could participate in this program again this year.
