Universal design for learning

- Universal Design for Learning (UDL) gives all students an equal opportunity to succeed
- This approach to teaching and learning offers flexibility in the ways students access material and show what they know
- UDL also looks for different ways to keep students motivated

The 3 main principles of UDL is:

1. **Engagement – where we look for ways to motivate learners and sustain their interest**
   a. Let students make choices
   b. Give assignments that feel relevant
   c. Create opportunities for students to get up and move around

2. **Representation – offer information in more than one format**
   a. Audio
   b. Video
   c. Hands on

3. **Action and expression – get learners more than one way to interact with the material and to show what they know**
   a. Paper and penzil
   b. Oral report
   c. Video
   d. Group project
