

# My experience in Finland

We went to Finland on May 11<sup>th</sup> and got back on May 18<sup>th</sup>. The flight was about 2 hours.

I saw that Finland is a lot cleaner than Hungary, but it's also a lot colder. I also saw that lots of people use public transportation. While we were heading to the school, I saw that Finland had lots of lakes, it has the nickname „The land of one thousand lakes”.

The schools were very big, and they had lots of chairs and even couches in the hallways. Fortunately, the students and the teachers were very kind and welcoming. We studied a lot of Finnish history, and some simple Finnish words and sentences. The school itself was very clean and big and had lots of classrooms and a large cafeteria. After entering, we immediately saw table tennis, and even a game console, which surprised me a lot.

After the lessons ended, we visited lots of places. We went to Puijo Tower which is in Kuopio. The tower is 75 meters tall. We walked around the top, and saw some interesting things, and some beautiful buildings.

The hotel we stayed at has two floors tall. We found a gym, and even some pools on the ground floor. It has a big dining area, which can seat hundreds of people. We even found a mini golf area, in which we played. The rooms were very nice and spacious, it had two bunk beds and a bathroom.

The flight back was 2 hours as well. I experienced an unforgettable event, and everybody was very excited and happy to be there.
