

Composition about Finland

Made by: Csékei Máté

Finland is an amazing country. I had a wonderful week in Kuopio. I really liked that the people were very calm and helpful. The Finnish people really love doing sports, mostly winter sports. Their national sport is ice hockey. They are obsessed with ice hockey in a good way. When we were in a bus we saw an outside hockey field, like in Hungary football fields. I really loved the school system. In the first day it was a bit odd. The Finnish government is taking care of the childrens in every day. They have free laptops, free e-books, the teachers are all well-qualified, so schools are really prestigious in Finland. The Finnish students are also independent, they can make their own schedule, so everyone can attend classes they want to. I wish we had this in Hungary. The students are also involved in decision-making. I liked we've only seen 1 man smoking cigarettes. The Finnish people love running or jogging. The streets are also very clean. I don't really liked that they didn't use any or a little bit of salt, but all the foods are delicious. They often eat potatoes and fish and drink milk to lunch, which is strange to me. The students call their teachers by their last name, but not irreverent. The student can also use a small kitchen, where they can cook. The schools are modern, they have table tennis tables in the hall and a billiard table too. All in all Finland is an awesome country, which is really interesting. I hope I could go back someday!
