

Essay about my time in Finland

The time I spent in Finland has been one of the most amazing experiences of my life so far. I had a great time there. I met a lot of amazing teachers and also students.

Personally, I also enjoyed the travelling part because it kind of felt like an adventure. I am glad that I could learn a lot of new skills and things about the Finnish culture. I built a good relationship with a lot of people there and I also could explore Kuopio and swim in the spa section of the hotel which were the two things that I really wanted to do there besides working together with Finnish students in the lessons. I could also see a beautiful sunset. I also had the opportunity to visit a lot of shops and see everyday things in Finland. It was really interesting to see that Finnish people are very honest, open and trustworthy.

There were a few things that I found quite interesting in our tour. First of all, it was interesting that they have 75 minutes long lessons. Secondly, I saw a lot of resting places inside the school which gives the students opportunity to rest whenever they want to. It was also interesting to see how independent the Finnish students are.

My favourite part was our second day at school because that was when I started to talk to people and I wasn't that shy anymore. Their food was also great.

I am also glad that I had the opportunity to go to the shopping centre because that way I could buy presents for my family. I also strengthened ties with my Hungarian group mates and got to know others from different groups. The smoke detected in the hotel that we experienced was a big shock because obviously no one had expected it but it is surely memorable. We were lucky because no one got hurt.

All in all, even though the end of the trip was a little exciting, I will never forget this trip and will always remember it as a great opportunity and adventure.
